[redacted] I received a call from Franklin J. Schupp, Staff Assistant, Committee on Foreign Affairs, who indicated that Congressman Armistead I. Selden (D., Ala.) indicated that he had been talking to the Director over the weekend and the Director had indicated that if he could review the Verona testimony, he would provide information for the Congressman as to what is true in the testimony and what is not true and would also provide an unclassified paper on subversive activities in the Latin American countries.
